Answer: C

NEW QUESTION: 3

You should know the difference between an exploit and a vulnerability. Which of the following refers to a weakness in the system?

- A. both
- B. vulnerability
- C. exploit

Answer: B

Explanation:

Explanation/Reference:

Explanation:

You should know the difference between an exploit and a vulnerability. An exploit refers to software, data, or commands capable of taking advantage of a bug, glitch or vulnerability in order to cause unintended behavior. Vulnerability in this sense refers to a weakness in the system.

NEW QUESTION: 4

In Hyperledger, nodes need a _____ to be able to communicate to the network.

- A. Valid Certificate
- B. Valid JSON file
- C. Valid YAML file
- D. Valid License

Answer: A

Explanation:

Explanation

In Hyperledger, nodes need a valid certificate to be able to communicate to the network and the participants use applications that connect to the network by way of the nodes.
