NEW QUESTION: 1

HOTSPOT

Answer:

Explanation:

Explanation:

When a file is deleted from the local OneDrive folder with File Explorer, the deletion is replicated to Onedrive.com and the file is moved to the OneDrive recycle bin. The deleted file can therefore be recovered from the Recycle Bin on Onedrive.com. If a user deletes a file from a local drive by using File Explorer, the file cannot be restored.

If the file is not in the OneDrive folder, it will not be a file that is synced to onedrive.com.

We could use Previous Versions to restore the file but this is prevented by the Group Policy settings.

The "Prevent restoring local previous versions" - Enabled group policy setting would prevent the previous version from being restored.
