Answer: B

NEW QUESTION: 3

Exhibit.

What button would you use to insert a link to the wizard associated with the notification as shown in the attached screenshot?

- A.** Option 4
- B.** Option 2
- C.** Option 1
- D.** Option 3

Answer: D

NEW QUESTION: 4

What is the BEST way to ensure that an intruder who successfully penetrates a network will be detected before significant damage is inflicted?

- A.** Implement vendor default settings
- B.** Install a honeypot on the network
- C.** Establish minimum security baselines
- D.** Perform periodic penetration testing

Answer: B

Explanation:

Explanation

Honeypots attract hackers away from sensitive systems and files. Since honeypots are closely monitored, the intrusion is more likely to be detected before significant damage is inflicted. Security baselines will only provide assurance that each platform meets minimum criteria. Penetration testing is not as effective and can only be performed sporadically. Vendor default settings are not effective.
