If you have determined the keycontainername for a specific certificate, you can delete the key container with the following command.

```

```

The -delkey option is supported only with the Windows Server 2003 version of certutil. On Windows 2000, you must add a prefix to the commands. The prefix is the path you have copied the Windows Server 2003 version of certutil to. In this white paper, the %HOMEDRIVE%\W2K3AdmPak path is used.
