- D. A detour protection tunnel is created for this LSP.

**Answer: A**

**NEW QUESTION: 2**

Was ist die Definition eines Projektergebnisses?

- A. Das Ergebnis der Änderung, die sich aus der Verwendung der Projektausgaben ergibt
- B. Eine messbare Verbesserung, die von einem oder mehreren Stakeholdern als Vorteil wahrgenommen wird
- C. Der Grund für das Projekt
- D. Die Spezialprodukte des Projekts.

**Answer: A**

**NEW QUESTION: 3**

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, Existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

You have a database named Sales.

The Customer table includes a column that stores the date for the last order that the customer placed.

You plan to create a table named Leads. The Leads table is expected to contain approximately 20,000 records.

Storage requirements for the Leads table must be minimized.

Tables

You need to begin to modify the table design to adhere to third normal form.

Which column should you remove for each table? To answer? drag the appropriate column names to the correct locations. Each column name may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Answer:**

Explanation:

Explanation

Box 1: SupplierName

SupplierName should be moved to a separate Supplier table.

Box 2: ProductName

ProductName is already defined in the Products table.
