NEW QUESTION: 1

Refer to the exhibit.

Your network is suffering excessive output drops. Which two actions can you take to resolve the problem? (Choose two.)

- A. Reconfigure the switch buffers.
- B. Configure the server application to use TCP.
- C. Install a switch with larger buffers.
- D. Update the server operating system.
- E. Configure a different queue set.

Answer: C,E

Explanation:

Installing a switch with larger buffers and correctly configuring the buffers can solve output queue problems. For each queue we need to configure the assigned buffers. The buffer is like the 'storage' space for the interface and we have to divide it among the different queues. This is how to do it:
