NEW QUESTION: 1

Cloud Kicks has 300K Account records and 16M Invoices. These were within a custom object in a master-detail relationship with the Account. Each Account record takes a long time to display because of the Invoice related list's lengthy rendering time. What should the Consultant do to solve this issue?

- A.** Enable indexing on all the fields visible on the related list of Invoices, as this will allow the related list to load faster.
- B.** Enable the "Separate Loading of Related Lists" setting from User Interface Settings, as this will allow the Account detail to render while the Invoice related list data will be visible after querying details from Invoices.
- D .** Enable "Load Individual Component Separately" at the Lightning record page of the Account object, as this will allow Account details to render while Invoice related list data will

be visible after querying details from Invoices.

C. Raise a case with Salesforce to enable Fast Loading of the related list of Invoices, as this will help to render Account details u faster.

Answer: B

NEW QUESTION: 2

How do today's customers interact with a brand?
