DRAG DROP

**Answer:**

Explanation:

Explanation:

A trusted user domain, often referred as a TUD, is a trust between AD RMS clusters that instructs a licensing server to accept rights account certificates (the certificates identifying users) from another AD RMS server in a different Active Directory forest. An AD RMS trust is not the same as an Active Directory trust, but it is similar in that it refers to the ability of one environment to accept identities from another environment as valid subjects.
