In addition, you may wonder if our C-TS450-2021 study materials become outdated, Quality of C-TS450-2021 practice materials you purchased is of prior importance for consumers.

**NEW QUESTION: 1**

A 10-month-old infant's mother says that he takes fresh whole milk eagerly, but that when she offered him baby foods at 6 months of age, he pushed them out of his mouth. Because he has gained weight appropriately, she has quit trying to get him to eat other foods. The nurse's response is based on the knowledge that:

- A. Milk intake should be limited to no more than four 8-oz bottles per day and should be followed by iron-enriched cereal or other solid foods or juices
- B. He should be started on iron-enriched cereal, meat, vegetables, fruits, and juices prior to bottle feeds. Milk intake should be limited to 1 qt/day
- C. It is acceptable to continue to give him whole milk and to delay giving solid foods as long as he takes a vitamin supplement daily
- D. Milk is an excellent food and will meet his nutritional needs adequately until he is ready to eat solid foods

**Answer: B**

Explanation:

(A) If the infant is given the bottle first, he will be less likely to be hungry enough to eat the solid foods. (B) Milk is deficient in iron, vitamin C, zinc, and fluoride. It does not provide an adequate diet. (C) The vitamin supplement will help, but the infant needs an iron supplement. (D) Giving the solid food when the infant is hungriest will increase the likelihood that he will eat. The more solid food he takes, the less milk he will desire.

**NEW QUESTION: 2**

You have a Microsoft Excel workbook that contains two tables. From Power BI, you create a dashboard that displays data from the tables.

You update the tables each day.

You need to ensure that the virtualizations in the dashboard are updated daily.
