Answer :

Explanation:
See explanation below.
Explanation

Step 1:

Click Resource groups from the menu of services to access the Resource Groups blade

Step 2:

Click Add (+) to create a new resource group. The Create Resource Group blade appears. Enter corp8548987 as the Resource group name, and click the Create button.

Step 3:

Select Create.

Your group is created and ready for you to add members. Now we need to assign a role to this resource group scope.

Step 4:

Choose the newly created Resource group, and Access control (IAM) to see the current list of role assignments at the resource group scope. Click +Add to open the Add permissions pane.

Step 5:

In the Role drop-down list, select a role Delegate administration, and select Assign access to: resource group corp8548987

NEW QUESTION: 3

An administrator is trying to vMotion a VM from his datacenter to a recovery site.

Which is the maximum allowed RTT (Round-Trip Time) latency between source and destination host?

- A. 150 milliseconds
- B. 100 milliseconds
- C. 15 milliseconds
- D. 10 milliseconds

Answer: A

Explanation:

Explanation

Round-Trip Time for Long-Distance vMotion Migration

If you have the proper license applied to your environment, you can perform reliable migrations between hosts that are separated by high network round-trip latency times. The maximum supported network round-trip time for vMotion migrations is 150 milliseconds. This round-trip time (RTT) lets you migrate virtual machines to another geographical location at a longer distance.
