NEW QUESTION: 1
HOTSPOT
Note: This question is part of a series of questions that use
the same scenario. For your convenience, the scenario is
repeated in each question. Each question presents a different
goal and answer choices, but the text of the scenario is
exactly the same in each question in this series.
A company named Contoso, Ltd. has several servers that run
Windows Server 2016. Contoso has a Hyper-V environment that
uses failover clustering and Windows Server Update Services
(WSUS). The environment contains several Windows containers and
several virtual machines.
The WSUS deployment contains one upstream server that is
located on the company's perimeter network and several
downstream servers located on the internal network. A firewall
separates the upstream server from the downstream servers.
You plan to deploy a human resources application to a new
server named HRServer5. HRServer5 contains a FAT32-formatted
data volume.
The CIO of Contoso identifies the following requirements for
the company's IT department:
- Deploy a failover cluster to two new virtual machines.
- Store all application databases by using Encrypted File
System (EFS).

- Ensure that each Windows container has a dedicated IP address assigned by a DHCP server.
- Produce a report that lists the processor time used by all of the processes on a server named Server1 for five hours.
- Encrypt all communication between the internal network and the perimeter network, including all WSUS communications.
- Automatically load balance the virtual machines hosted in the Hyper-V cluster when processor utilization exceeds 70 percent.
You need to create a Data Collector Set to meet the requirement for the processor time report.
What command should you run to create the Data Collector Set?
To answer, select the appropriate options in the answer area.

NEW QUESTION: 2
To improve members' abilities to make appropriate care decisions about specific medical problems, some health plans use a form of decision support known as telephone triage programs. The following statements are about telephone triage programs. Select the answer choice containing the correct statement.
A. Currently, none of the major accrediting agencies offers an accreditation program specifically for telephone triage programs.
B. The primary role of telephone triage clinical staff is to diagnose the caller's condition and give medical advice.
C. Quality management (QM) for telephone triage programs typically focuses on the clinical information provided rather than on the quality of service.
D. A telephone triage program may also include a self-care component.
Answer: C

NEW QUESTION: 3
Note: This question is part of a series of questions that present the same scenario. Each question in this series contains a unique solution. Determine whether the solution meets the stated goals.
You are developing a new application that uses a stored procedure. The stored procedure inserts thousands of records as a single batch into the Employees table.
Users report that the application response time has worsened since the stored procedure was updated. You examine disk-related performance counters for the Microsoft SQL Server instance and observe several high values that include a disk

performance issue. You examine wait statistics and observe an unusually high WRITELOG value.
You need to improve the application response time.
Solution: You replace the stored procedure with a user-defined function.
