- D. ì<•ìšα ì<æê•,ëš^ ë¶„ì„•

Answer: D

NEW QUESTION: 2

Ihr Netzwerk enthält eine Active Directory-Domäne mit dem Namen adatum.com. Die Domäne enthält die in der folgenden Tabelle aufgeführten Objekte.

GroupA verfügt über Vollzugriffsberechtigungen für einen

Ordner mit dem Namen Folder1. GroupB verfügt über Vollzugriffsberechtigungen für einen Ordner mit dem Namen Folder2. Sie führen das folgende Powershell-Skript aus.

Wählen Sie für jede der folgenden Anweisungen Ja aus, wenn die Anweisung wahr ist. Andernfalls wählen Sie Nein. HINWEIS: Jede richtige Auswahl ist einen Punkt wert.

Answer:

Explanation:

NEW QUESTION: 3

- A. Option D
- B. Option C
- C. Option A
- D. Option B

Answer: C

Explanation:

EDGE1 is an exchange server 2010 CAS-8 would be an exchange server 2013 Typically, you would enable the anti-spam agents on a mailbox server if your organization doesn't have an Edge Transport server, or doesn't do any prior anti-spam filtering before accepting incoming messages. Connection Filtering agent is only available on the Edge Transport server role. Exchange 2013 does not have an Edge Transport server role yet. The Connection Filter agent and the Attachment Filter agent are only available on an Edge Transport server. Connection Filtering on Edge Transport Servers: Exchange 2013 Help Anti-spam agents on Legacy Edge Transport servers If your organization has an Exchange 2007 or Exchange 2010 Edge Transport server installed in the perimeter network, all of the anti-spam agents that are available on a Mailbox server are installed and enabled by default on the Edge Transport server. However, the following anti-spam agents are only available on an Edge Transport server: Connection Filtering agent Connection filtering inspects the IP address of the remote server that's trying to send messages to determine what action, if any, to take on an inbound message. The remote IP address is available to the Connection Filtering agent as a byproduct of the underlying TCP/IP connection that's required for the SMTP session. Connection filtering uses a variety of IP Block lists, IP Allow lists, as well as IP Block List provider services or IP Allow List provider services to determine whether the connection from the specific IP should be blocked or allowed in the organization. For more information about connection filtering in Exchange 2010, see <fwlink to [http://technet.microsoft.com/library/bb124320\(v=exchg.141\).aspx](http://technet.microsoft.com/library/bb124320(v=exchg.141).aspx) >. Attachment Filter agent Attachment filtering filters messages based on attachment file name, file name extension, or

file MIME content type. You can configure attachment filtering to block a message and its attachment, to strip the attachment and allow the message to pass through, or to silently delete the message and its attachment. For more information about attachment filtering in Exchange 2010, see [http://technet.microsoft.com/library/bb124399\(v=exchg.141\).aspx](http://technet.microsoft.com/library/bb124399(v=exchg.141).aspx)

What's Discontinued in Exchange 2013

[http://technet.microsoft.com/en-us/library/jj619283\(v=exchg.150\).aspx](http://technet.microsoft.com/en-us/library/jj619283(v=exchg.150).aspx)

Feature Anti-spam agent management in the EMC In Exchange 2010, when you enabled the anti-spam agents on the Hub Transport server, you could manage the anti-spam agents in the Exchange Management Console (EMC). In Exchange 2013, when you enable the anti-spam agents in the Transport service on a Mailbox server, you can't manage the agents in the Exchange admin center (EAC). You can only use the Exchange Management Shell. For information about how to enable the anti-spam agents on a Mailbox server, see [Enable Anti-Spam Functionality on a Mailbox Server](#).

Connection Filtering agent on Hub Transport servers In Exchange 2010, when you enabled the anti-spam agents on a Hub Transport server, the Attachment Filter agent was the only anti-spam agent that wasn't available. In Exchange 2013, when you enable the anti-spam agents in the Transport service on a Mailbox server, the Attachment Filter agent and the Connection Filtering agent aren't available. The Connection Filtering agent provides IP Allow List and IP Block List capabilities. For information about how to enable the anti-spam agents on a Mailbox server, see [Enable Anti-Spam Functionality on a Mailbox Server](#).

Note:

You can't enable the anti-spam agents on an Exchange 2013 Client Access server. Therefore, the only way to get the Connection Filtering agent is to install an Exchange 2010 or Exchange 2007 Edge Transport server in the perimeter network. For more information, see [Use an Edge Transport Server in Exchange 2013](#).

Sender Filter agent

Sender filtering compares the sender on the MAIL FROM: SMTP command to an administrator-defined list of senders or sender domains who are prohibited from sending messages to the organization to determine what action, if any, to take on an inbound message.

Content Filter agent

Content filtering assesses the contents of a message. Spam quarantine is a feature of the Content Filter agent that reduces the risk of losing legitimate messages that are incorrectly classified as spam. Spam quarantine provides a temporary storage location for messages that are identified as spam and that shouldn't be delivered to a user mailbox inside the organization. For more information, see [Recipient Filter](#)

agent

Recipient filtering compares the message recipients on the RCPT TO: SMTP command to an administrator defined Recipient Block list. If a match is found, the message isn't permitted to enter the organization.

You can't enable the anti-spam agents on an Exchange 2013 Client Access server.

Therefore, the only way to get the Connection Filtering agent is to install an Exchange 2010 or Exchange 2007 Edge Transport server in the perimeter network. Connection Filtering agent is only available on the Edge Transport server role. Exchange 2013 does not have an Edge Transport server role yet.

NOT B C D

Only need to identify 1 and this is connection filtering.

NEW QUESTION: 4

Click the Exhibit button.

The exhibit shows a Windows 2019 server with two FC HBAs using ALUA.

How many paths to LUN1 are active/optimized? (Choose the best answer.)

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C
