Here, the CTFL-UT test cram review will be the best study material for your preparation.

NEW QUESTION: 1

Which of the following best describes the purpose of debugging programs?

- A. To compare source code versions before transferring to the test environment
- B. To generate random data that can be used to test programs before implementing them.
- C. To protect, during the programming phase, valid changes from being overwritten by other changes.
- D. To ensure that program coding flaws are detected and corrected.

Answer: D

Explanation:

Debugging provides the basis for the programmer to correct the logic errors

in a program under development before it goes into production.
