NEW QUESTION: 2
Which Ariba document do you use to design a future state
solution in Ariba Contract Management?
Note: There are 3 correct answers to this question
A. Savings Form Data Collection Template
B. Contracting Process Design Matrix (Missed)
C. Business Requirements Workbook
D. Header Field Data Collection Template (Missed)
E. Enablement Workbook (Missed)
Answer: B,D,E

NEW QUESTION: 3
Refer to the exhibit.

Which statement is true?
A. IS-IS has been enabled on R4 for IPv6, multitopology.
B. R4 advertises IPv6 prefixes, but it does not forward IPv6
traffic, because the protocol has not been enabled under
router IS-IS.
C. IS-IS has been enabled on R4 for IPv6, single-topology.
D. IS-IS has been enabled on R4 for IPv6, single-topology and
multitopology.
Answer: C
Explanation:
When working with IPv6 prefixes in IS-IS, you can configure
IS-IS to be in a single topology for both IPv4 and IPv6 or to
run different topologies for IPv4 and IPv6.
By default, IS-IS works in single-topology mode when activating
IPv4 and IPv6. This means that the IS-IS topology will
be built based on IS Reachability TLVs. When the base topology
is built, then IPv4 prefixes (IP Reachability TLV) and
IPv6 prefixes (IPv6 Reachability TLV) are added to each node as
leaves, without checking if there is IPv6 connectivity
between nodes.
