We are the best, You can check the information and test the functions by the three kinds of the free demos according to our three versions of the DES-1121 exam questions.

### **NEW QUESTION: 1**

#### **HOTSPOT**

You manage two cloud services named Service1 and Service2. The development team updates the code for each application and notifies you that the services are packaged and ready for deployment.

Each cloud service has specific requirements for deployment according to the following table.

In the table below, identify the deployment method for each service. Make only one selection in each column.

#### **Answer:**

Explanation:

## Explanation

### \* Service 1

As the package must be retained we should deploy it through the Azure Storage cloud.

### \* Service 2

As maintaining the existing storage package is not required we can deploy the package locally.

### \*Azure service package

Whenever you want to deploy your application to a Cloud Service you'll be creating a Service Package and upload it, together with the Service Configuration to a deployment in a Cloud Service. These two artifacts are what makes up a Cloud Service deployment.

## **NEW QUESTION: 2**
