**NEW QUESTION: 1**

You have a server named Server1 that runs Windows Server 2012 R2.

You configure IPsec rules for connections to Server1.

On Server1, you plan to create an inbound firewall rule that contains the following settings:

- \* Allows inbound connections to an application named Appl.exe
- \* Applies to the domain profile
- \* Overrides any block rules

You need to identify the minimum information required to create the rule.

Which two pieces of information should you identify? Each correct answer presents part of the solution.

- A. the name of the IPsec policies that apply to Server1
- B. the list of Active Directory users who are authorized to use the application
- C. the hash of the application
- D. the list of computers that are authorized to use the application

E. the local path of the application

**Answer: D,E**

Explanation:

Explanation

E: To add a program to the rules list, you must specify the full path to the executable (.exe) file used by the program.
