If you purchase now, you can free download our latest version within next year, If you do questions carefully and get the key knowledge, you will pass IIA-CHALL-SGP exam easily and save a lot of time and money.

NEW QUESTION: 1

Your company is concerned that when developers introduce open source Libraries, it creates licensing compliance issues. You need to add an automated process to the build pipeline to detect when common open source libraries are added to the code base.

What should you use?

- A. Jenkins
- B. Microsoft Visual SourceSafe
- C. Black Duck
- D. Code Style

Answer: C

Explanation:

Explanation

Secure and Manage Open Source Software

Black Duck helps organizations identify and mitigate open source security, license compliance and code-quality risks across application and container portfolios.

Black Duck Hub and its plugin for Team Foundation Server (TFS) allows you to automatically find and fix open source security vulnerabilities during the build process, so you can proactively manage risk. The integration allows you to receive alerts and fail builds when any Black Duck Hub policy violations are met.

Note: WhiteSource would also be a good answer, but it is not an option here.
