A network administrator has purchased two devices that will act as failovers for each other. Which of the following concepts does this BEST illustrate?

- A. Integrity
- B. Authentication
- C. Availability
- D. Confidentiality

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Failover refers to the process of reconstructing a system or switching over to other systems when a failure is detected. In the case of a server, the server switches to a redundant server when a fault is detected.

This strategy allows service to continue uninterrupted until the primary server can be restored. In the case of a network, this means processing switches to another network path in the event of a network failure in the primary path. This means availability.
