You plan to use Hyperdrive to optimize the hyperparameters selected when training a model. You create the following code to define options for the hyperparameter experiment

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION: 3

Your network contains an Active Directory forest named litwareinc.com.

The forest has a single domain.

The forest contains a System Center 2012 Configuration Manager environment.

The environment contains a single primary site.

You create a group named InstallTechs.

You need to ensure that the members of InstallTechs can deploy Applications to desktop computers by using Configuration Manager.

The solution must minimize the number of permissions assigned to InstallTechs.

What should you do?

- A.** Assign the Application Administrator security role to InstallTechs. Create a new collection that contains all of the desktop computers. Scope InstallTechs to the new collection.
- B.** Assign the Application Deployment Manager security role to InstallTechs. Create a new collection that contains all of the desktop computers. Scope InstallTechs to the new collection.
- C.** Add the Application Deployment Manager security role to InstallTechs. Create a new collection that contains computers. Add InstallTechs to the local Administrators group on each desktop computer.
- D.** Assign the Application Administrator security role to InstallTechs. Create a new collection that contains all of the desktop computers. Add InstallTechs to the local Administrators group on each desktop computer.

Answer: B

Explanation:

<http://technet.microsoft.com/en-us/library/hh524341.aspx>

Glossary for Microsoft System Center 2012 Configuration Manager Application Administrator A security role that grants permissions to administrative users so that they can perform both the Application Deployment Manager role and the Application Author role. Application Deployment Manager A security role that grants permissions to administrative users

so that they can deploy and monitor applications.

<http://blogs.technet.com/b/hhoy/archive/2012/03/07/role-based-administration-in-systemcenter-2012-configuration-manager.aspx>
Role-Based Administration in System Center 2012 Configuration Manager In Configuration Manager 2012, Security Roles are used to collectively group objects and permissions (operations) for assignment to an Administrator. Instead of an individual permission set on a single instance of object, the Security Role provides a single Role assignment to an administrator; reducing the overall complexity with permission management. An "object" in the Security Role is something that you want to manage access to and "permission" is the operational functions, such as Read, Modify and Delete.

NEW QUESTION: 4

Which Symantec Mail Security 8300 appliance is configured for RAID 10?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D
