- A. ASTRA for 4690
- B. POSGUI for 4690
- C. SI GUI
- D. GUI Creator for 4690

Answer: C

NEW QUESTION: 4

A zone is a logical area where devices with similar trust levels reside. For example, we could define a DMZ for devices in the DMZ in an organization. A zone is created by the administrator, and then interfaces can be assigned to zones. A zone can have one or more interfaces assigned to it. Any given interface can belong to only a single zone. There is a default zone, called the self zone, which is a logical zone.

- A. A zone is a logical area where devices with similar trust levels reside.
- B. A zone is created by the administrator, and then interfaces can be assigned to zones.
- C. A zone can have one or more interfaces assigned to it.
- D. Any given interface can belong to only a single zone.

Answer: C

Explanation:

Explanation

A zone is a logical area where devices with similar trust levels reside. For example, we could define a DMZ for devices in the DMZ in an organization. A zone is created by the administrator, and then interfaces can be assigned to zones. A zone can have one or more interfaces assigned to it. Any given interface can belong to only a single zone. There is a default zone, called the self zone, which is a logical zone.
