After all, the pdf dumps have some limits for the people who **PDF NSE5_EDR-5.0 VCE** want to study with high efficiency, It will bring a big change in your life and make it possible to achieve my goal.

Do they really live up to their reputation, This is a version **PDF NSE5_EDR-5.0 VCE** of the exercises, so you can see the quality of the questions, and the value before you decide to buy.

It can help your future in the IT industry to the next level.

NEW QUESTION: 1

In the past few years, the import of cars to Italy increased significantly. In the years 1994 to 2001 the number of imported cars increased by 12% each year. How many cars were imported to Italy in the year

2000?

(1) In 1997, 12,500 cars were imported to Italy.

(2) During the years 1997 to 1999, 42,180 cars total were shipped to Italy.

A. Statements (1) and (2) TAKEN TOGETHER are sufficient to answer the question, even though NEITHER statement BY ITSELF is sufficient.

B. Statement (1) BY ITSELF is sufficient to answer the question, but statement (2) by itself is not.

C. Statements (1) and (2) TAKEN TOGETHER are NOT sufficient to answer the question, requiring more data pertaining to the problem.

D. Statement (2) BY ITSELF is sufficient to answer the question, but statement (1) by itself is not.

E. Either statement BY ITSELF is sufficient to answer the question.

Answer: E

Explanation:

Explanation/Reference:

Explanation:

From the question we know that the number of cars grew by 12% each year.

From (1) we can learn that if in 1997 12,500 cars were shipped then in 1998 ($1.12 \times 12,500$) cars were shipped and so on until 2000. This statement is sufficient.

From (2) we can learn that during a certain period 42,180 cars were shipped, if you define X as the number of cars that were shipped in 1997 then: $42,180 = X + 1.2X + 1.2(1.2X)$ and so we can find X and anything else we wish to find. Either statement alone is sufficient.

NEW QUESTION: 2

Refer to the exhibit. An engineer is using XML in an application to send information to a RESTCONF-enabled device. After sending the request, the engineer gets this response message and a HTTP response code of 400. What do these responses tell the engineer?

A. POST was used instead of PUT to update

B. The Content-Type header sent was application/xml.

C. The Accept header sent was application/xml

D. JSON body was used

Answer: C

Explanation:

Explanation

Accept and Content-type are both headers sent from a client (a browser) to a service. Accept header is a way for a client to specify the media type of the response content it is expecting and Content-type is a way to specify the media type of request being sent from the client to the server.

The response was sent in XML so we can say the Accept header

sent was application/xml.

NEW QUESTION: 3

Which of the following investigates the likelihood that each specific risk will occur?

- A. Risk probability and impact assessment
- B. Risk urgency assessment
- C. Risk audits
- D. Risk register

Answer: A

NEW QUESTION: 4
