#### **NEW QUESTION: 2**

How would you equip your bot handle an unresolved intent?

- A.** By defining an error property that points to an error state.
- B.** Define a state for the System.Intent's unresolvedIntent action to track the messages that couldn't be resolved within the minimum confidence threshold.
- C.** There is no way to handle an unresolved intent.
- D.** On System.Intent set the minimum confidence threshold to 0.01 to avoid unresolved intent situation.

**Answer: B**

**NEW QUESTION: 3**

A network administrator is trying to add a new router into an established OSPF network.

The networks attached to the new router do not appear in the routing tables of the other OSPF routers. Given the information in the partial configuration shown below, what configuration error is causing this problem?

```
Router(config)# router ospf 1
```

```
Router(config-router)# network 10.0.0.0 255.0.0.0 area 0
```

- A. The AS is configured improperly.
- B. The OSPF area is configured improperly.
- C. The network wildcard mask is configured improperly.
- D. The network subnet mask is configured improperly.
- E. The process id is configured improperly.
- F. The network number is configured improperly.

**Answer: C**

Explanation:

When configuring OSPF, the mask used for the network statement is a wildcard mask similar to an access list. In this specific example, the correct syntax would have been

```
"network 10.0.0.0 0.0.0.255 area 0."
```

**NEW QUESTION: 4**

A customer wants to trade in older 802.11a/b/g access points for new 802.11n access points. What must be considered before deploying new 802.11n access points?

- A. New APs should bundle channels 1, 6, and 11 to increase throughput to 150 Mbps.
- B. 5-GHz coverage is needed when expecting 300-450 Mbps client link.
- C. Fewer APs are needed because 802.11n runs on a different radio frequency.
- D. Fewer access points are needed because 802.11n has better coverage.

**Answer: B**
