- A. A profit of EUR 18,166.05
- B. Nil
- C. A profit of EUR 16,847.58
- D. A loss

Answer: C

NEW QUESTION: 2

- A. Option E
- B. Option A
- C. Option D
- D. Option B
- E. Option C

Answer: C

Explanation:

"Contoso has four clouds." This part is missing in this question but appears in the real exam.

My guess is answer should be D. Connecting to a private cloud means establishing a connection to a VMM 2012 Management Server. However, you can also add a Windows Azure subscription to App Controller. Before anyone can use App Controller, an administrator must configure it to communicate with VMM for private clouds, or Windows Azure for public cloud services. Connecting App Controller to VMM is straightforward. Connecting (or subscribing) App Controller to an Azure subscription requires a little more work.

One of the coolest features of App Controller is its support for multiple connections and subscriptions. If for business reasons you implement different VMM deployments, you can connect App Controller to each deployment. Similarly, if you have multiple subscriptions to the Microsoft Azure service, you can add them to App Controller.
